## SUBMITTAL TECHNICAL INFO

### Specifications—Profile+

\_\_\_\_\_ permanently tensioned projection screens, size \_\_\_\_\_ h. x \_\_\_\_\_ w. (viewing area), designed for wall mounting. 1/2" (1.27 cm) of black extruded thin bezel trim frame shall be visible from the front, and shall attach to hidden base frame using a compression fit. The face of the frame shall be less than 1 1/4" (4.5 cm) away from the wall, with a beveled back to give the screen the appearance of floating in front of the wall. Viewing surface to have 3/4" hem pocket on all four sides to accept screen insertion tubing. Surface wraps around and attaches to extruded base frame using extruded plastic strips, eliminating pulling and puckering inherent to fabric attachment utilizing snaps or hook & loop fabric strips. Matt White XT1000V and Grey XH600V viewing surfaces are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit [ul.com/gg](http://ul.com/gg). Base trim frame extrusions shall provide for up to 1 1/2" of horizontal and vertical surface tension adjustability in 1/4" increments to combat screen stretch and sag over time. Frame equipped with mounting flange that mates with wall brackets.
